

IEP CoPilot Insight

Voice-Activated IEP Planning

Meet Arinjoy, a 2-year-old boy who was diagnosed with special needs and received the IEP, thanks to Alta California and EGUSD. However, there are many other children who are not detected early and also do not receive the corrective actions needed to address their special needs at a young age

Assumed Statistics of Students With Special Needs Diagnosis Issues (in millions)

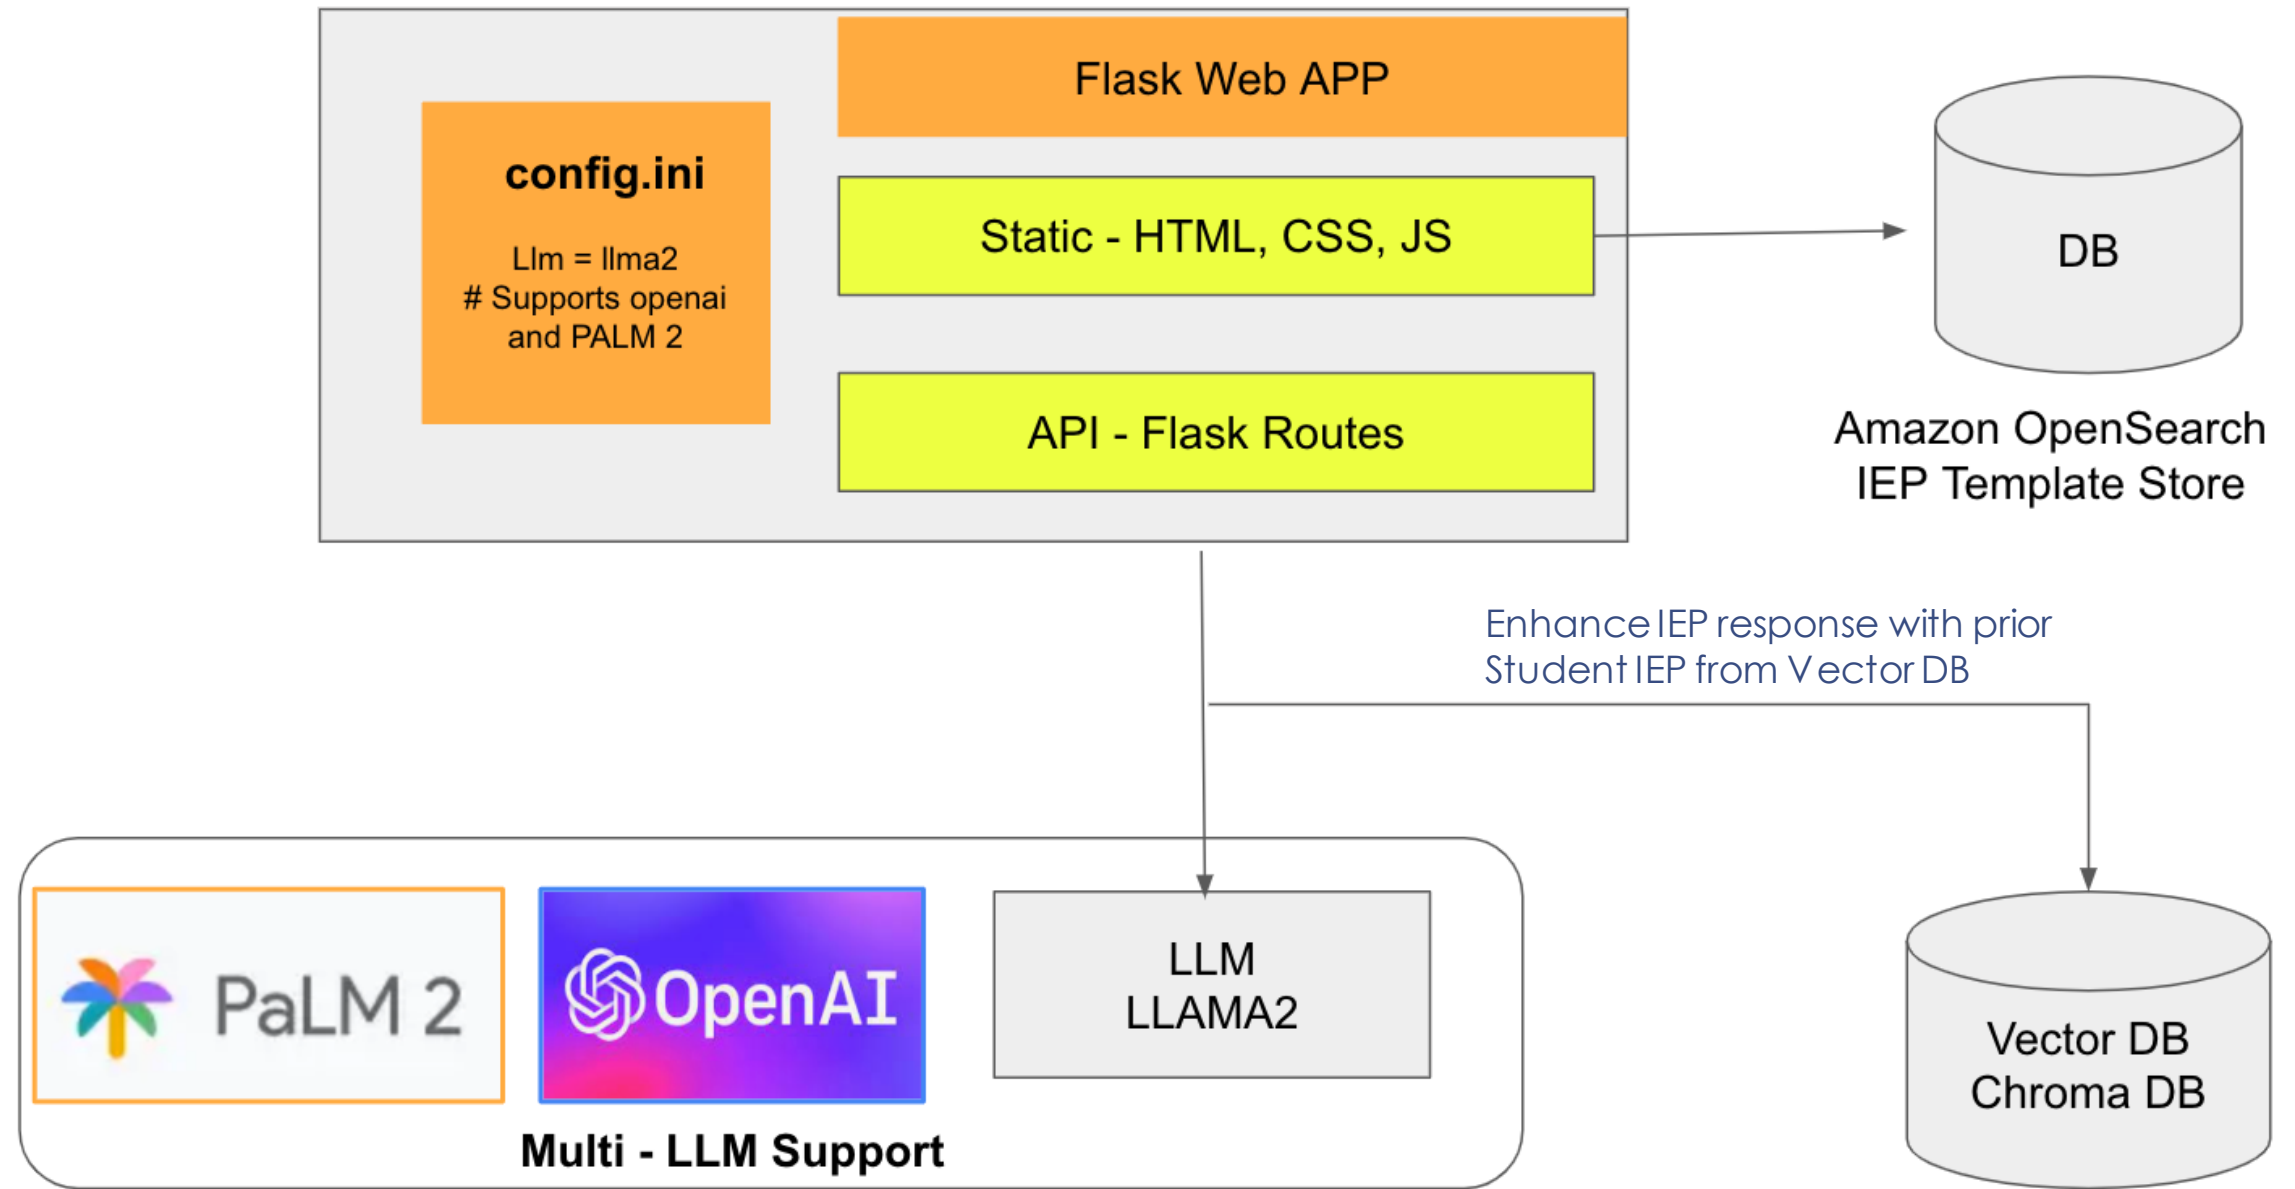

IEP CoPilot Insight

- Introducing the "IEP CoPilot Insight: **Voice-Activated IEP Planning**" - an innovative application that harnesses the power of AI to democratize access to specialized education planning. Teachers or guardians initiate the app during planning sessions with the student

UN SDG Alignment: Quality Education, ensuring inclusive and equitable learning for all.
